

## Spring 2012 Atelier Workshop Series

Atelier is preparing the Spring 2012 Workshop Series.

The workshops will help you refine your software skills to better represent your ideas. For instance, you can improve your rendering abilities, get a better handle on Revit and learn tricks in Illustrator.

The workshops will be taught by experienced tutors and are open to all skill levels. To best prepare for the workshops, we would like to get your input in the following survey. We want to know what software skills you would like to refine and when you could attend.

Please note: these free workshops are for BAC students only. They are not intended to replace a course and attendance does not count for course credit.

### 1. What software skills would you like to refine?
